Description

Metal detectable semi-gloss paper-foil laminate construction, laminated with an acrylic, permanent adhesive to a glassine liner. This solution is available in a range of shapes and sizes but is predominantly used as a self-adhesive label.

Printability

Variable information printing and barcodes are possible using a thermal transfer printer and suitable ribbons. It is also possible to write on the surface using suitable pens. We are happy to advise on the best printer and ribbon solution for maximum resistance and readability.

Applications

Has a special acrylic adhesive which means the construction can resist up to 200°C ambient temperature, but it is recommended that test are undertaken by you to determine suitability for your specific requirements. They are able to supply them in a variety of colours and can custom print to your requirement

Regulation Compliance

The adhesive and materials all comply with the rules of Regulation (EC) No 1935/2004 of the European Parliament and of the council of 27 October 2004 on materials and articles intended to come into contact with food.
